Promatraj i istraži

ŽSV učitelja matematike u PŠ, Pazin

European Schoolnet

Transforming education in Europe

Ivana Gugić, prof. matematike i fizike

Go- Lab/Next- Lab ambassador

OŠ Frana Galovića, Zagreb

Email: ivana.gugic1@skole.hr

- Profesorica matematike i fizike u OŠ Frana Galovića u Zagrebu
- 8 godina radnog iskustva u nastavi
- Sudjelovanje na nekoliko međunarodnih projekata iz fizike, matematike i astronomije
- Vanjski suradnik na projektima u organizaciji NCVVO-a
- Autorica pismenih ispita znanja, recenzent udžbenika za ŠK
- Suautorica Metodičkog priručnika za nastavnike matematike (izdavač ŠK)
- Go- Lab /Next - Lab ambasador za RH

Sadržaj predavanja

- O međunarodnim projektima – European Schoolnet
- Projektna i istraživačka znanstvena metoda- primjena u nastavi
- Go – Lab/Next- Lab projekti; Go- Lab portal
- Platforma *Graasp* - platforma za pisanje pripreme za nastavni sat s primjenom istraživačke metode

European Schoolnet - PROJEKTI

Projekti i organizacije u sklopu *European Schoolnet-a*

<http://www.eun.org>) :

- inGenious
- Go-lab/Next-Lab
- Scientix (CARNet koordinator)
- ISE projekt (CARNet koordinator)

Projektna i istraživačka metoda

Ciljevi primjene projektne i istraživačke metode u nastavi:

- stvoriti kod učenika naviku na interdisciplinarni rad i na usvajanje metoda znanstveno- istraživačkog rada
- poticati razvoj komunikacijskih, organizacijskih, kritičkih sposobnosti i mišljenja učenika, matematičko-logičkog mišljenja i razmišljanja, te njegovati timski rad
- razvijati digitalnu kompetenciju kod učenika češćom uporabom IKTa na nastavnom satu
- unaprijediti proces učenja i poučavanja novim didaktičko –metodičkim pristupima, primjenom e-učenja
- kod učenika potaknuti razvoj nekih ključnih kompetencija, a koje su važne u konceptu cjeloživotnog učenja (*matematičku i digitalnu kompetenciju, osnovne kompetencije u prirodoslovlju, te kompetenciju Učiti kako učiti*)

Go- Lab portal ; Go-Lab/Next –Lab projekt

- <http://www.golabz.eu/>
- **Projekti kojima je cilj korištenje IKT-a na nastavi prirodoslovno-matematičkih predmeta**
- **Omogućavaju uporabu on-line simulacija, virtualnih laboratorija, aplikacija, alata za izradu kvizova, edukativne igre...**
- **Odabir nastavnih jedinica (istraživačkih prostora) po predmetima i dobi učenika**

The screenshot shows the GO-LAB portal interface. At the top, there is a navigation menu with links for Labs, Apps, Spaces, Authoring, Support, and About. A search icon is visible in the top right corner. The main header features the text "Online Labs" and a sub-header "Find online labs to enrich your classroom activities with exciting scientific experiments." Below this, there is a description of online labs and a "Publish Lab" button. A "Sort" dropdown menu is set to "Most Viewed". A "Subject Domains" list includes Astronomy (37), Biology (50), Chemistry (90), Engineering (27), Environmental Education (36), Geography And Earth Science (27), Mathematics (53), Physics (304), and Technology (36). Two lab listings are visible: "Electrical Circuit Lab" and "Gravity Force Lab".

GO-LAB Labs Apps Spaces Authoring Support About

Online Labs

Find online labs to enrich your classroom activities with exciting scientific experiments.

Online labs provide your students with the possibility to conduct scientific experiments in an online environment. Remotely-operated labs (remote labs) offer an opportunity to experiment with real equipment from remote locations. Virtual labs simulate the scientific equipment. Data sets present data from already performed lab experiments. Please use the filters on the right to find appropriate online labs for your class. Labs can be combined with dedicated Apps to create Inquiry Learning Spaces (ILSs).

Electrical Circuit Lab

In the Electrical Circuit Lab students can create their own electrical circuits and do measurements on it. In the circuits the students can use resistors, light bulbs, switches, capacitors and coils. The circuits can be powered by a AC/DC power supply or batteries.

Gravity Force Lab

This lab allows the user to visualise the gravitational force that two objects exert on each other.

Subject Domains

- Astronomy (37)
- Biology (50)
- Chemistry (90)
- Engineering (27)
- Environmental Education (36)
- Geography And Earth Science (27)
- Mathematics (53)
- Physics (304)
- Technology (36)

GO-LAB Labs Apps Spaces Authoring Support About

Area Builder

Type Virtual Lab
Lab Owner Amanda McGarry, Ariel Paul, Beth Stade, Bryce Gruneich, John Blanco, Karina K.r. Hensberry, Kathy Perkins, Phet Interactive Simulations
Age Range Before 7, 7-8, 9-10, 11-12
Subject Domains Geometry, Mathematics
Languages Basque, Chinese, Danish, Dutch, English, French, German, Greek, Hindi, Hungarian, Italian, Japanese, Latvian, Polish, Portuguese, Russian, Serbian, Slovak, Spanish, Swedish, Turkish

[more ...](#)

Description

Create your own shapes using colorful blocks and explore the relationship between perimeter and area. Compare the area and perimeter of two shapes side-by-side. Challenge yourself in the game screen to build shapes or find the area of funky figures. Try to collect lots of stars!

Description

Tool to practice with vector addition

Aplikacije

Function Plotter

This app plots mathematical functions. Multiple functions can be drawn in the same plot. Derivative and a tangent can be inserted for the last added function via the press of a button.

Calculator

A simple calculator which supports addition, subtraction, multiplication, division, square root and exponentiation.

Geogebra

The Geogebra app enables teachers to embed Geogebra materials to their Inquiry Learning Spaces. Links for Geogebra materials can be retrieved from <https://www.geogebra.org/>

Sysquake Mobile

```
Sysquake js 1.0
x = 0:pi/25:4*pi;
y = -exp(2*cos(x));
plot(x,y,'r')
```

Sysquake

This app allows the use of Matlab in an Inquiry Learning Space.

GRAASP –platforma za pripremu nastavnih jedinica (Istraživačkih prostora, ILS-a – “Inquiry learning speaces”) s primjenom istraživačke metode

Copy & use this Inquiry Space

Description:
 Istražite osnovno o razlomcima: koliko je $\frac{1}{3}$ čokoladne torte, polovina kruga... s pomoću zabavne interaktivne simulacije predvidite i objasnite kako se mijenja vrijednost razlomka ako se promijene vrijednosti brojnika ili nazivnika, napravite dva razlomka jednakih vrijednosti, upoređujte razlomke. Spojite oblike i razlomke, osvojite zvjezdice (poene).

Fractions Introduction (uvod u razlomke) ivana ▾

Uvod Teorija Istraživanje Zaključak

Kad kruh preprežemo na dva jednaka dijela dobivamo polovine, kad čokoladu podijelimo na 5 jednakih dijelova dobivamo petine, kad tortu režemo na 8 jednakih šnita dobivamo osmine....Polovine, četvrtine, petine, osmine nazivaju se **RAZLOMCI**.

Razlomci su brojevi koje dobijemo djeljenjem cjeline na manje jednake dijelove.

U ovoj vježbi istražiti ćete osnovno o razlomcima.

1

Najprije u bilježnicu **odgovori na pitanja**, a zatim provjeri s pomoću aplikacija u *Istraživanju* jesi li tvoji odgovori točni.

1. Što pokazuje brojnik (gornji broj), a što nazivnik (donji broj) ?
2. Koju računsku radnju zamjenjuje razlomak?
3. Što iskazujemo razlomkom?
4. Može li razlomak biti jednak 1? Kada je razlomak manji, a kada veći od 1?
5. Može li se svaki prirodan broj zapisati u obliku razlomka?
6. Može li se svaki razlomak zapisati u obliku prirodnog broja?
7. Istraži što su mješoviti brojevi i od čega se sastoje.
8. Istraži za koje razlomke kažemo da su pravi, a za koje da su nepravi razlomci? Nacrtaj sliku s pomoću aplikacija pravog i nepravog razlomka.

 $\frac{1}{2}$

Fractions Introduction (uvod u razlomke) ivana ▾

Uvod **Teorija** Istraživanje Zaključak

S pomoću interaktivnih simulacija provjeri točnost svojih odgovora u *Teoriji* te riješi zadatke. Simulaciju pokreni na "Run now" ili download.

1. *zadatak*:
Odaberi pravokutnik i istakni njegove dvije trećine. Precrtaj sliku u bilježnicu.

2. *zadatak*:
Odaberi tortu i označi dvije petine šnita. Precrtaj sliku u bilježnicu.

3. *zadatak*:
U igri "Jednakost razlomaka (equality lab)" pronađi dva razlomka jednaka:
a) jednoj trećini b) pet polovine c) tri šestine

Reflection Tool

Category	Go-Lab Inquiry Apps
Creator	Anjo Anjewierden, Sven Manske, Tobias Hecking
License	Creative Commons Attribution-Sharealike (CC BY-SA)
Source Code	http://go-lab.gw.utwente.nl/p...
Works Offline	No

Description
The Reflection Tool gives feedback to students about their use of an Inquiry learning Space (ILS). The tool displays the percentage of time a student has spent in the various inquiry phases compared to a percentage norm set by the teacher (see image). Students are prompted to reflect on their ILS use by a number of questions teachers can enter during configuration.

Reflecting on time spent in inquiry phases

Reflection involves thinking back about what you did and the choices you made. Please look at the activity time log below to recall how you spent your time in the inquiry phases. A suggested norm time, provided by the ILS creator, has been added to help you make comparisons.

File Drop

Category	Collaboration Apps
Creator	Maria Jesus Rodriguez Triana, Na Li
License	Creative Commons Attribution-Noncommercial (CC BY-NC)
Source Code	http://shindig2.epfl.ch/gadge...
Works Offline	No

Description

This app allows students to upload files, e.g., assignment and reports, to the Inquiry learning Space. The app also allows teachers to download the uploaded files.

Report Tool

Category	Go-Lab Inquiry Apps
Creator	Jakob Sikken
License	Creative Commons Attribution-Noncommercial (CC BY-NC)
Source Code	http://go-lab.gw.utwente.nl/p...
Works Offline	No

Description

In the report tool the learners can create the final report of their work. The learners can include the content of other tools, such as concept maps, hypotheses, questions, observations and data graphs.

As a teacher you can change the configuration of this tool. In the configuration menu (behind the gear icon) you can define the section titles of the report and give a short explanation to the learners about the meaning and expected content for each section.

Akvarij

Metoda “Obrnute učionice” (Flipped classroom)

Primjer

Tema: Valovi Predmet: Fizika Dob učenika: 12.g.

- Učenici unaprijed otkrivaju i pronalaze fizikalne činjenice, stvaraju određeno teorijsko predznanje, te stvaraju određene jednostavne pretpostavke i hipoteze o valovima. Dolaskom na nastavni sat učenici svoje pretpostavke i hipoteze provjeravaju primjenom istraživačke znanstvene metode kroz različite aktivnosti, jednostavne pokuse, a koje mogu osmisliti sami ili ih unaprijed osmišljava nastavnik.

Aktivnost 1. -učnički val

Aktivnost 2. - demonstracija vala uz pomoć opruge

Aktivnost 3. - istraživanje valova uz pomoć platforme Graasp

A screenshot of the GO-LAB platform interface. The page title is "Valovi (waves)" by Ivana Gugic. It includes a search bar, navigation links for "Online Labs", "Apps", "Inquiry Spaces", and "Big Ideas". A social media sidebar on the left shows icons for Facebook, Twitter, Google+, LinkedIn, Email, and a plus sign. The main content area features a large image of a blue ocean wave. To the right of the image, there are details: "Age range: 12-14", "Language: Croatian", "Level of difficulty: Medium", "Level of interaction: Medium", "Average learning time: 2 didactic hours", "Access rights: Creative Commons Attribution (CC BY)", and "Contact Person: Ivana". Below this is a "Like 0" button and a "Tweet" button. At the bottom, there are two orange buttons: "Preview" and "Copy & use this Inquiry Space".

Aktivnost 4. - "Slatki val"

Mišljenje učenika

- U razgovoru s učenicima pokazalo se da je ovakav način učenja i vježbanja kroz projektnu i istraživačku nastavu njima zanimljiviji i zabavniji, motiviraniji su za rad
- Uspješniji su i učenici koji nastavu pohađaju po posebnim nastavnim programima
- Introvertirani učenici pokazali su volju i trud za ostvarivanjem vlastitog cilja i shvatili koliko je važan timski rad
- Rezultati formativnog i sumativnog vrednovanja su se pokazali boljima

Zašto se uključiti u međunarodne projekte Go-Lab/Next- Lab ?

- Omogućuju drugačiji pristup nastavi
- Mogućnost sudjelovanja na radionicama, tečajevima (MOOC) predavanjima i ljetnim školama izvan RH (Belgija, Grčka, Poljska...)
- Suradnja s kolegama nastavnicima iz drugih zemalja Europe

Hvala na pažnji! 😊
